

Certificate of Recognition

Proactive Supplier

We are a proud member of the Assent Sustainability Network.

By joining, we've embraced a smarter, more scalable approach to product compliance and sustainability. It's compliance simplified, helping you — our valued customer — gain deeper supply chain visibility and stay one step ahead of shifting regulations.

Joining the Assent Sustainability Network allows us to:

- ▶ Input data once and share it securely with you and all relevant customers, and spend less time on duplicate requests
- ▶ Share information faster, so you can meet (and exceed) expectations every time
- ▶ Anticipate compliance demands before they land. No scrambling, just stress-free compliance

We don't react to requests — we proactively share the data customers need, driving stronger partnerships, reducing delays, and elevating our reputation as a top-tier supplier.

Why our customers benefit from us being in the network:

- ▶ Access to more comprehensive data, including our submitted information and publicly available sources
- ▶ Immediate access to declarations when they're already in the network
- ▶ Reduced request fatigue means we can respond to you faster

By joining the Assent Sustainability Network, we demonstrate our ongoing commitment to our partnership, to compliance, and to cutting-edge supply chain sustainability practices.
