

Quickstart Guide BKV Go Solution

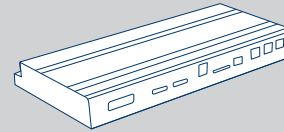

Easy handling with the BKV Go configuration website

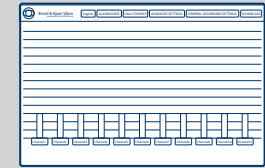

Mount the housing and the sensors, like e.g. AS-667

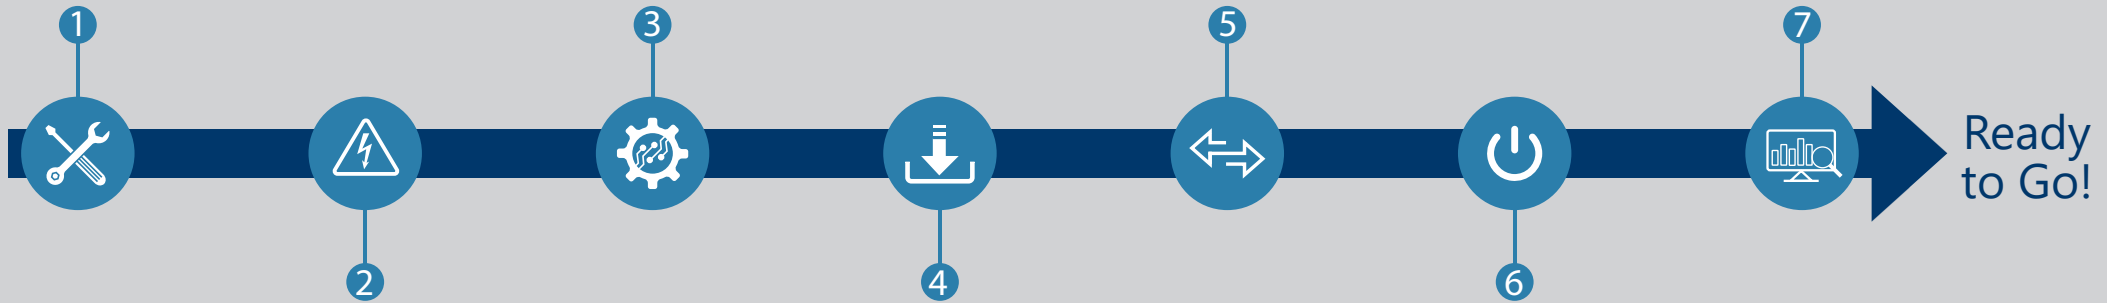

Configure the condition monitoring system via the BKV Go configuration website:
<https://go.bkvibro.com>

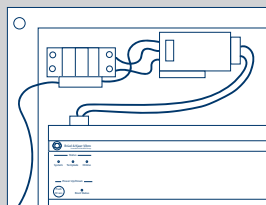

Plug the USB stick into the VCM-3 device

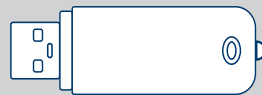

You can monitor the collected vibration data on the BKV Go Dashboard:
<https://<VCM-3 IP>:8080>

Perform the electrical wiring of the VCM-3 and the sensors

Download the configuration file, then copy the three unzipped files onto a USB stick (labeled as EXT_STORAGE)

Turn on the VCM-3 and the configuration will start automatically
